

# Create your own Schooner!

*A **schooner** is a type of sailing ship defined by its rig configuration. Typically it has two or more masts, the foremast being slightly shorter than the mainmast. These boats were (and still are!) popular sailing vessels. The term schooner first appeared in North America in the early 1700's and were used for fishing and trade.*

*The Pilgrim Monument and Provincetown Museum has several model replicas of schooners on display and in its collections and archives!*
